

Benefits

- Excellent broadband sound absorption.
- Perfect for sportshalls, exhibition spaces, lecture theatres, factories etc.
- Fibre free.
- Removable fabric cover is machine washable.
- Durable and impact resistant.
- Lightweight.
- Easily installed between existing services.

TVS ABSorb Cubes are excellent acoustic absorbers, providing a unique and attractive solution to reduce the reverberation time of a space. Perfect for use within areas where wallspace is of a minimum and particularly useful within large, high ceilinged rooms such as production halls, gymnasias and event centres. These lightweight cubes offer excellent broadband sound absorption and can be easily installed between existing services. They available in a variety of colours and patterns and can brighten and add interest to any space.

Description

TVS ABSorb Cubes are created from Basotect Class O foam covered in a zipped, removable fabric cover. Available as either a 400mm or a 600mm cube, these cubes are easily suspended from the ceiling. With a variety of colours available and the ability to suspend the cubes at different heights, an infinite number of patterns and visual appearances are possible.

Physical Information

Cube Size 400mm x 400mm x 400mm
 600mm x 600mm x 600mm

Acoustical Performance

Sound absorption values (% absorption to ÖNORM EN 20354/absorber m²)

Frequency (Hz)	125	250	500	1000	2000	4000
600mm Cubes	0.97	1.96	2.56	2.56	2.36	2.34
400mm Cubes	0.36	0.88	1.22	1.22	1.17	1.06
