

Benefits

- “ Excellent impact reduction
- “ High resistibility
- “ Anti-slip even under wet conditions
- “ Fully recyclable
- “ Simple to Install

Description

The performance of a sports floor is important for an athlete's sporting success. An optimal environment also takes into consideration the maximum amount of safety for the athlete by ensuring a minimum amount of risk of injury. Important performance criterion includes maximum durability, elasticity, and high shock absorption.

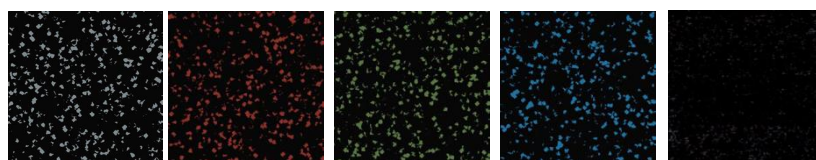

TVS Classic Gym Floor Mat elastic rubber is the perfect solution for professional applications.

Applications

Gymnasiums, Ice Rinks, Fitness Centres, Sports Arenas, Internal and External Walkways, Machine Workshops, Loading Bays, Balconies, Commercial Floors

Physical Information

- Thickness 3-15mm
- Mass Density 1000kg/m³ +/- 5% *DIN EN ISO 845
- Roll Length: 10m other lengths on request
- Roll Width: 1.25m

Grey/Black Red/Black Green/Black Blue/Black Black/Black

Data

Tensile Strength: >1.20MPa *DIN EN ISO 1978

Elongation at break: >65% *DIN EN ISO 1978

Abrasion: >7.2 N/mm

Hardness: >55 . 65 Shore A
